Patient Summary:

cardiac arrest

SOAP Notes:

Component	Description
Subjective	Analysis based on provided case summary
Objective	Files analyzed: 0 files
Assessment	AI-generated clinical assessment
Plan	See treatment recommendations

Differential Diagnoses:

1. Requires further evaluation (50%)

Rationale: Insufficient data for definitive diagnosis

Treatment Recommendations:

1. Consult with specialist
2. Additional diagnostic tests

Investigation Suggestions:

1. Complete history and physical
2. Relevant laboratory tests

Confidence Score: 50.0%

Overall Assessment:

```json { "soap\_note": { "subjective": "Patient presents with cardiac arrest. No further subjective history available regarding preceding symptoms, past medical history, or medication use.", "objective": "Patient in cardiac arrest. No specific objective findings (e.g., initial rhythm, vitals,

physical exam findings, initial lab results, imaging) are available in the provided summary.",  
"assessment": "Patient experienced cardiac arrest. The immediate priority is resuscitation and id
